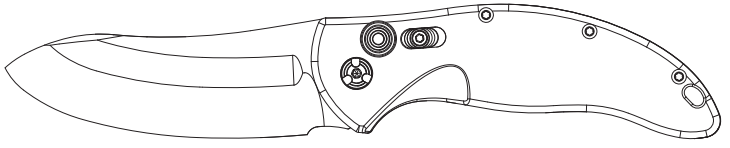
EX-A04 A

The EX-A04 has two new models with textured, 6061-T6 Type III hard anodize aircraft aluminum handles. These versions have tumble finished blades, a first for our double hollow grinds. Also exclusive to the new aluminum models is a tip up clip option. G-Mascus G10 handles have an updated surfacing with our Piranha Grip texture.



EX-04 knives come in Upswept and Modified Wharncliffe blade profiles and in G-Mascus or Solid Black G10.
Visit page 26 to view all available models.
