HOGUE INC ANNOUNCES HANDALL® BEAVERTAIL GRIP SLEEVES

Henderson, NV – Hogue, Inc., is proud to announce their newest line of HandALL grip sleeves: The Hogue HandALL Beavertail Grip Sleeve. The new grip sleeves are designed to fit specific polymer pistols now on the market. “Polymer pistols do not have removable grips that you can simply replace,” said grip designer Matt Hogue. “The solution for many of these pistols is our new HandALL Beavertail Grip Sleeves.”

The Beavertail Grip Sleeve line has been engineered with models for precision fits on specific firearms. The initial offerings in this series has sleeves designed for perfect fits on three sizes of polymer firearms. The first offering precisely fits Smith & Wesson’s M&P 9mm and 40 Shield and Ruger’s LC9. The second sleeve fits Glock’s 42 and 43. The final sleeve is designed for Smith & Wesson’s M&P 45 Shield and Kahr Arms’ P9, P40, CW9 and CW40.

While each sleeve has been created for a precise fit on specific polymer framed firearms, they also alternatively fit many other similarly sized firearms with a fully functional and aesthetic fit. “These sleeves also provide a very nice fit for many pistols that may not have any other alternative available on the market” said Hogue.

The Beavertail Grip Sleeves are installed by slipping them over the frame of the firearm until seated into perfect position. Once installed, the HandALL sleeve provides a single finger groove for instinctive handling of the firearm. The finger groove leads into a gentle palm swell that has been carefully designed to fit naturally in the hand. The beavertail built into the grip sleeve rises high along the backstrap of the frame giving full rubber contact with the hand allowing a higher hand-placement on the grip without the fear of the slide biting the skin between the thumb and the trigger finger. In addition to protection and comfort, the beavertail also cushions the hand during recoil.

The HandALL is built from a long-lasting durable thermoplastic elastomer compound. This rubber ages very gracefully and keeps a firm, tacky feel throughout the life of the grip. It will not harden, split or crack with age or usage. The grip sleeve is textured with Hogue’s familiar Cobblestone™ texture, a series of small circular bumps that provide an efficient non-slip, non-irritating grip on the rubber. Hogue’s HandALL Beavertail Grips Sleeves have an MSRP of \$9.95 for black, and \$10.95 for OD green, flat dark Earth, pink and purple.

Hogue grip sleeves are manufactured in their family-owned and operated facilities under the direct supervision of the Hogue family. Hogue, Inc. supports local dealers and encourages customers to purchase Hogue products locally. For more information please call Hogue directly at 1-800-438-4747 or visit www.hogueinc.com to find a Hogue dealer near you.
