

HOGUE INC ANNOUNCES LASER ENHANCED GRIPS FOR SMITH & WESSON K/L AND J FRAME REVOLVERS

Henderson, NV – Hogue, Inc., is proud to announce the newest additions to their growing line of Laser Enhanced (LE) Grips. Revolver grips for Smith & Wesson's round butt K/L and J Frames are now in stock. "For years our customers have been asking for Hogue Grips with lasers," said LE Grip designer and managing partner Jim Bruhns. "We have expanded our line of Hogue LE Grips to include models for Smith & Wesson K, L and J Frame owners in direct response to customer demand."

Hogue's LE Grips are the first handgun laser sighting system on the market based on a fully programmable, digitally-controlled microprocessor circuit. Hogue's designers capitalized on the advantage by programming three operating modes (steady, flashing or stealth target) and four laser brightness levels into the LE Grip's circuit. They also tapped into sophisticated power management routines to ensure long life from two common CR-2032 batteries hidden under the grip on the non-laser side – an important design feature enabling battery changes that won't take the laser out of zero. Each LE Grip is bore-sighted at the factory while fine windage and elevation adjustments are accessible via small set screws. All of the Hogue LE Grip's programming features are accessible via pressure-sensitive programming buttons.

The Hogue LE Grips for S&W revolvers are truly unique; the company's engineers embedded the system's 630-670nm<5mw Class 3R red laser diode, circuitry and batteries into two custom-designed grip frames that sit underneath a classic Hogue one piece Rubber Grip. "That's a potent combination of a first rate laser sighting system and classic Hogue Monogrip®," said Bruhns.

Hogue's Smith & Wesson revolver LE Grips have an MSRP of \$189.99 for black, and \$199.95 for colors. "We're delivering a powerful, feature-loaded product at a price point that practically breaks the price performance curve in this product category," said Bruhns. Both models come in black, purple and pink while the K/L grip is also available in dark Earth.

Hogue LE Grips are manufactured in their family-owned and operated USA facilities under the direct supervision of the Hogue family. Hogue, Inc. supports local dealers and encourages customers to purchase Hogue products locally.
