

HOGUE INC ANNOUNCES G10 GRIPS FOR RUGER'S MARK IV

Henderson, NV – Hogue Incorporated, America's premier manufacturer of handgun grips, has added models to fit Ruger's Mark IV pistols to their expansive line of G10 offerings. Precision machined to the exact specifications of the Mark IV, Hogue's G10 grips are designed for a lifetime of use.

The grips are designed for a perfect ergonomic fit with a thin yet super-strong profile. They are available in a Piranha Grip texture for an aggressive grip, a diamond checkering for a lighter textured feel, and in a smooth finish for a sleek, more subtle touch. The thumb recess is tapered for unimpeded access to the push button magazine release. Hogue's Mark IV grips are available in G-Mascus® Black/Grey, G-Mascus Green and Solid Black G10. The MSRP is \$39.95 for the smooth grips or \$59.95 for the textured options.

G10 is comprised from layers of fiberglass and epoxy resin pressed together under enormous pressure and heat. The resulting material is very light-weight yet incredibly strong and unsusceptible to all oils and chemicals making it very suitable for handgun grips. It also possesses excellent thermal properties which make the grip impervious to temperature change. Hogue has developed their own patented G-Mascus material which mimics the visual characteristics of Damascus steel.

Hogue produces more G10 products for the firearms industry than any other manufacturer in the world. They not only offer after-market options for many popular pistols but also service many OEM customers such as SIG Sauer, Wilson Combat, Tactical Solutions and others.

Hogue is celebrating fifty years of quality manufacturing in their family-owned and operated facilities under the direct supervision of the Hogue family. Hogue, Inc. supports local dealers and encourages customers to purchase Hogue products locally. For more information please call Hogue directly at 1-800-438-4747 or visit www.hogueinc.com to find a Hogue dealer near you.
