## HOGUE KNIVES ANNOUNCES THE X1-MICROFLIP™

Henderson, NV – Hogue Knives is pleased to introduce the newest addition to their quality line of knives, the X1-Microflip button lock flipper. “The X1-Microflip is an amazing piece of precision manufacturing” said Hogue lead knife engineer Scott Bruhns. “Our customers have been demanding a streamlined sub 3.0 inch Allen Elishewitz designed knife and we have seriously knocked this one out of the park. This knife is so full of features it honestly has to be held to fully appreciate the cohesive design and execution by Allen and the Hogue team.”

The Microflip features Hogue’s robust button lock mechanism along with their patent-pending blade retention device. This unique instrument retains the blade in the closed position allowing the user to create stored up kinetic energy culminating in the firing of the blade. With an intuitive press of the lock button the knife can be easily closed with one-hand without placing fingers in the path of the closing blade like standard liner lock flippers. “This knife contains no springs. It is a manual flipper yet acts surprisingly like an automatic,” exclaims Bruhns.

Designed specifically as an every day carry pocket knife, the X1-Microflip is the first knife in the Hogue

line with a blade measuring under three inches. The 2.75" Drop Point blade profile comes either stone wash tumbled or with a black Cerakote<sup>®</sup> finish. Made from .120" thick CPM154 steel, the blade offers superior corrosion resistance while providing excellent edge retention. It is cryogenically heat treated to 57-59 RC then hand sharpened and honed.

The Type III hard coat anodize 6061-T6 aluminum frame is sculpted for an ergonomic grasp and comfortable one-handed deployment. The frame is patterned with an escalating indent texture for additional grip traction and includes a pointed impact pommel. Models are available in matte finished black, grey, flat dark earth or aquamarine. The frame includes a reversible clip and filler plate for ambidextrous tip up carry. The X1-Microflip sports an MSRP of \$149.00 - \$159.00.

All Hogue Knives are designed by former Recon Marine Allen Elishewitz and made in the USA by Hogue, Inc. Hogue supports local dealers and encourages customers to purchase Hogue products locally.
