

HOGUE INC. ANNOUNCES

KIMBER K6s RUBBER GRIPS

Henderson, NV – Hogue Incorporated is proud to announce the release of rubber grips for Kimber's K6s DASA and DAO small frame revolvers. "Kimber's K6s offers a fine option for snub nose revolver fans – a perfect choice for concealed carry," said grip designer Pat Hogue. "Hogue is pleased to have created classic Hogue rubber Monogrips® to offer shooters an ergonomic upgrade to the factory grips."

Hogue's rubber grips are known for their long lasting durability and comfort and the K6s grip is no exception. The finger grooves lead into a gentle palm swell that has been carefully designed to fit naturally in the hand for instinctive handling. The grip is textured with Hogue's familiar Cobblestone™ pattern that provides an efficient non-slip, non-irritating grip on the rubber. The three finger grooves extend the grip surface further down the revolver providing greater hand surface area. Finally, the grip is compatibly designed with clearance for speed loader use.

Hogue's rubber K6s grips join their G10 offerings to provide revolver shooters more quality alternatives. The grips are available in black, aqua, purple and pink and MSRP at a friendly \$29.95.

Hogue grips are manufactured in their family-owned and operated facilities under the direct supervision of the Hogue family. Hogue Inc. supports local dealers and encourages customers to purchase Hogue products locally. For more information please call Hogue directly at 1-800-438-4747 or visit www.hogueinc.com.
