

HOGUE INC. ANNOUNCES

SLATE GREY

AR-15/M16 TACTICAL COMPONENTS

Henderson, NV – Hogue Inc.® is proud to introduce Slate Grey OverMolded® components to their AR-15/M16 tactical line. With an overwhelming amount of customer requests, Hogue has delivered a full line of grips, forends and buttstocks featuring this new variation.

Hogue tactical rifle grips are specifically designed to retain the important lines and aesthetics of tactical rifles. OverMolded rubber standard and beavertail models are available with or without finger grooves, and provide a comfortable grip with palm swells and their exclusive Cobblestone™ pattern. These grips also accommodate the Cargo Management System and the Samson® Field Survival Kit.

Hogue's free floating forends are constructed with 6061-T6 aluminum and are anodized according to military specifications. Free floating the forend tube enhances the accuracy of the rifle by keeping stress off the barrel. The non-slip OverMolded rubber gripping area insulates your hand from the heat and shock generated by rapid fire. Select models come with a complete collection of mounting accessories making Hogue forends the perfect comfortable alternative to bulky, quad-rail systems.

Hogue OverMolded collapsible and fixed buttstocks feature reinforced polymer construction with a rubber cheek rest and a rubber/polymer hybrid butt pad that provides snag-free shouldering. This unique design creates a snug, anti-rattle, friction fit that prevents unwanted movement along the buffer tube. Both buttstocks provide multiple swivel sleeve and sling mounting locations.

These components can also be purchased in 2 piece and 3 piece kits with accessory attachment options. Hogue tactical products are manufactured in the USA in Hogue family owned and operated facilities. Hogue Inc. supports local dealers and encourages customers to purchase Hogue products locally. For more information please call Hogue directly at 1-800-438-4747 or visit www.hogueinc.com.
