

NEW RELEASE

# HOGUE® HANDALL® BEAVERTAIL™ GRIP SLEEVES

SPRINGFIELD ARMORY®

## HELLCAT™

### Henderson, NV

Continuing the expansion of Hogue's HandALL® grip sleeve line, models are now available for the Springfield Armory® Hellcat™. Numerous customer requests quickly gained the interest of Hogue engineers since the Hellcat's initial release. Hogue answered with an all new Beavertail™ grip sleeve guaranteed to enhance the shooting experience of this compact, everyday carry pistol.

The advantages of Hogue's Beavertail grip sleeves on polymer pistols are evident upon installation. Perceived recoil is significantly reduced by Hogue's renowned ultra-soft rubber. The beavertail feature provides added protection for the pulcrine of the hand, while the finger grooves allow consistent grasp and secure hold. It has become common for shooters to resort to custom stippling to upgrade the factory texture of polymer pistols; however, this practice ultimately compromises the original condition of the firearm's frame. To avoid this irreversible trade-off, Hogue has perfected their Beavertail grip sleeve design to ensure a long-lasting, yet non-permanent alternative that will greatly enhance the shooter's grip experience. Hogue HandALL Beavertail grip sleeves come in a variety of colors and retail at an affordable \$12.95.

Hogue Grip sleeves are manufactured in their family-owned and operated facilities under direct supervision of the Hogue family. Hogue Inc. supports local dealers and encourages customers to purchase Hogue products locally. For more information, please call Hogue Inc. directly at 1-800-438-4747 or visit [www.hogueinc.com](http://www.hogueinc.com).

## SPECIFICATIONS

### Beavertail

Cushions the hand on recoil and offers increased hand comfort higher on the grip.

### Durable composition

Made from thermoplastic elastomer that endures wear and ages gracefully for years of service.

### Cobblestone™ texture

Renowned Hogue texture increases comfort while also providing non-irritating grip.

### Finger grooves

Naturally position fingers for optimal grip.

### Precision fitment

Designed for a tight and secure fit, engaging with the texture and contours of the firearm's frame.
