

HOGUE KNIVES ANNOUNCES

THE TRAUMA™

ABLE LOCK® FIRST RESPONSE TOOL

Henderson, NV – Hogue Knives® is pleased to announce the addition of the Trauma to their full line of precision cutting instruments. The Trauma has been designed to enhance your response effectiveness by delivering increased confidence in the tools you use. Engineered to satisfy the stringent needs of the first responder, this knife is equally suitable for all everyday carry needs.

The Trauma sports a .125" Bohler N680 steel blade that is designed to offer an impressive combination of toughness, wear and corrosion resistance. The 3.4" sheepfoot or opposing bevel blades are stone washed or finished with black Cerakote®, and hand sharpened and honed to a keen edge. The blade is controlled by the ABLE locking mechanism which features smooth operation, a tough lock bar and Wolff wireform springs.

The Trauma's lightweight exterior is manufactured from medium textured peel ply G10 offering a fine balance between additional grip without being overly aggressive. The frame houses a deployable strap cutter, an oxygen valve wrench and a carbide glass breaker. The utility tool is finished with a low profile, tip-up ambidextrous pocket clip and the inclusion of a MOLLE system compatible knife pouch. The knife is available in solid black or safety orange and sports an MSRP of \$179.95 – 189.95.

Every Hogue knife is made in the USA and is backed by three generations of manufacturing expertise. For more information, please call Hogue directly at 1-800-438-4747 or visit www.hogueknives.com.

HOGUE KNIVES' FIRST RESPONSE TOOL

The ABLE lock driven Trauma has been engineered to satisfy the stringent needs of the first responder while still offering plenty of everyday carry options. A strap cutter rotates open to safely cut through fibrous materials with ease. A carbide glass breaker and included oxygen wrench complete the tool utility.

ABLE LOCK[®] MECHANISM

Ambidextrous Bar Lock Enhanced Lock incorporates superior finish and geometry for smooth operation and durable lock bar.

SPECS

Blade Length: 3.4"
Overall Length: 8.25"
Weight: 4.7 oz

BLADE COMPOSITION

Bohler N680 stainless steel (.125" thickness) cryogenically heat treated to a hardness of 57-59 HRC. Available in sheepsfoot or opposing bevel blade styles, hand honed to a flat ground edge.

STRAP CUTTER

Rotates open from its framed housing to safely cut through fibrous materials with ease.

CARBIDE GLASS BREAKER

G10 SCALES

Machined from medium textured peel ply G10 offering a fine balance between additional grip without being overly aggressive. Available in solid black or safety orange.

OXYGEN VALVE WRENCH

CNC-machined through the G10 scale as well as the stainless steel liner providing years of dependable service.

SERRATIONS

Partial serrations enable additional cutting practices.

POCKET CLIP

Reversible tip up carry, stainless steel clip allows for right or left handed preference.
