HOGUE®

AR-15/M16 MODULAR GRIP

CREATE YOUR OPTIMAL CONFIGURATION

Henderson, NV

Hogue engineers have evolved their AR-15/M16 OverMolded® grip to now offer users the opportunity to customize their grip configuration to suit their needs. The AR Modular Grip includes two frontstraps, with and without finger grooves, and two backstraps with and without a Beavertail™. The straps slide onto the channels of the main grip body before installation onto the lower receiver and offer the user complete control over their grip modification. Additionally, a 17 degree design provides more vertical grip angle than the standard A2 grip. Similar to Hogue's popular AR Monogrip, the AR Modular Grip is constructed of OverMolded thermoplastic elastomer that endures wear and ages gracefully for years of service. Perceived recoil is significantly reduced by this ultra-soft rubber. The main grip body is textured with Hogue's renowned Cobblestone™ texture in order to provide a non-irritating grip while also increasing comfort. A strategic recession in the OverMold allows for smooth operation of the safety selector switch. The grips are available in Black, OD Green, Slate Grey and Flat Dark Earth colors and retail at \$39.95.

Hogue tactical products are manufactured in the USA in Hogue family-owned and operated facilities. Hogue Inc. supports local dealers and encourages customers to purchase Hogue products locally. For more information, please call Hogue Inc. directly at 1-800-438-4747 or visit hogueinc.com.
