

NEW RELEASE

HOGUE®

# LASER ENHANCED GRIPS

SPRINGFIELD 911 // SIG SAUER P938

PROUDLY MADE IN THE USA

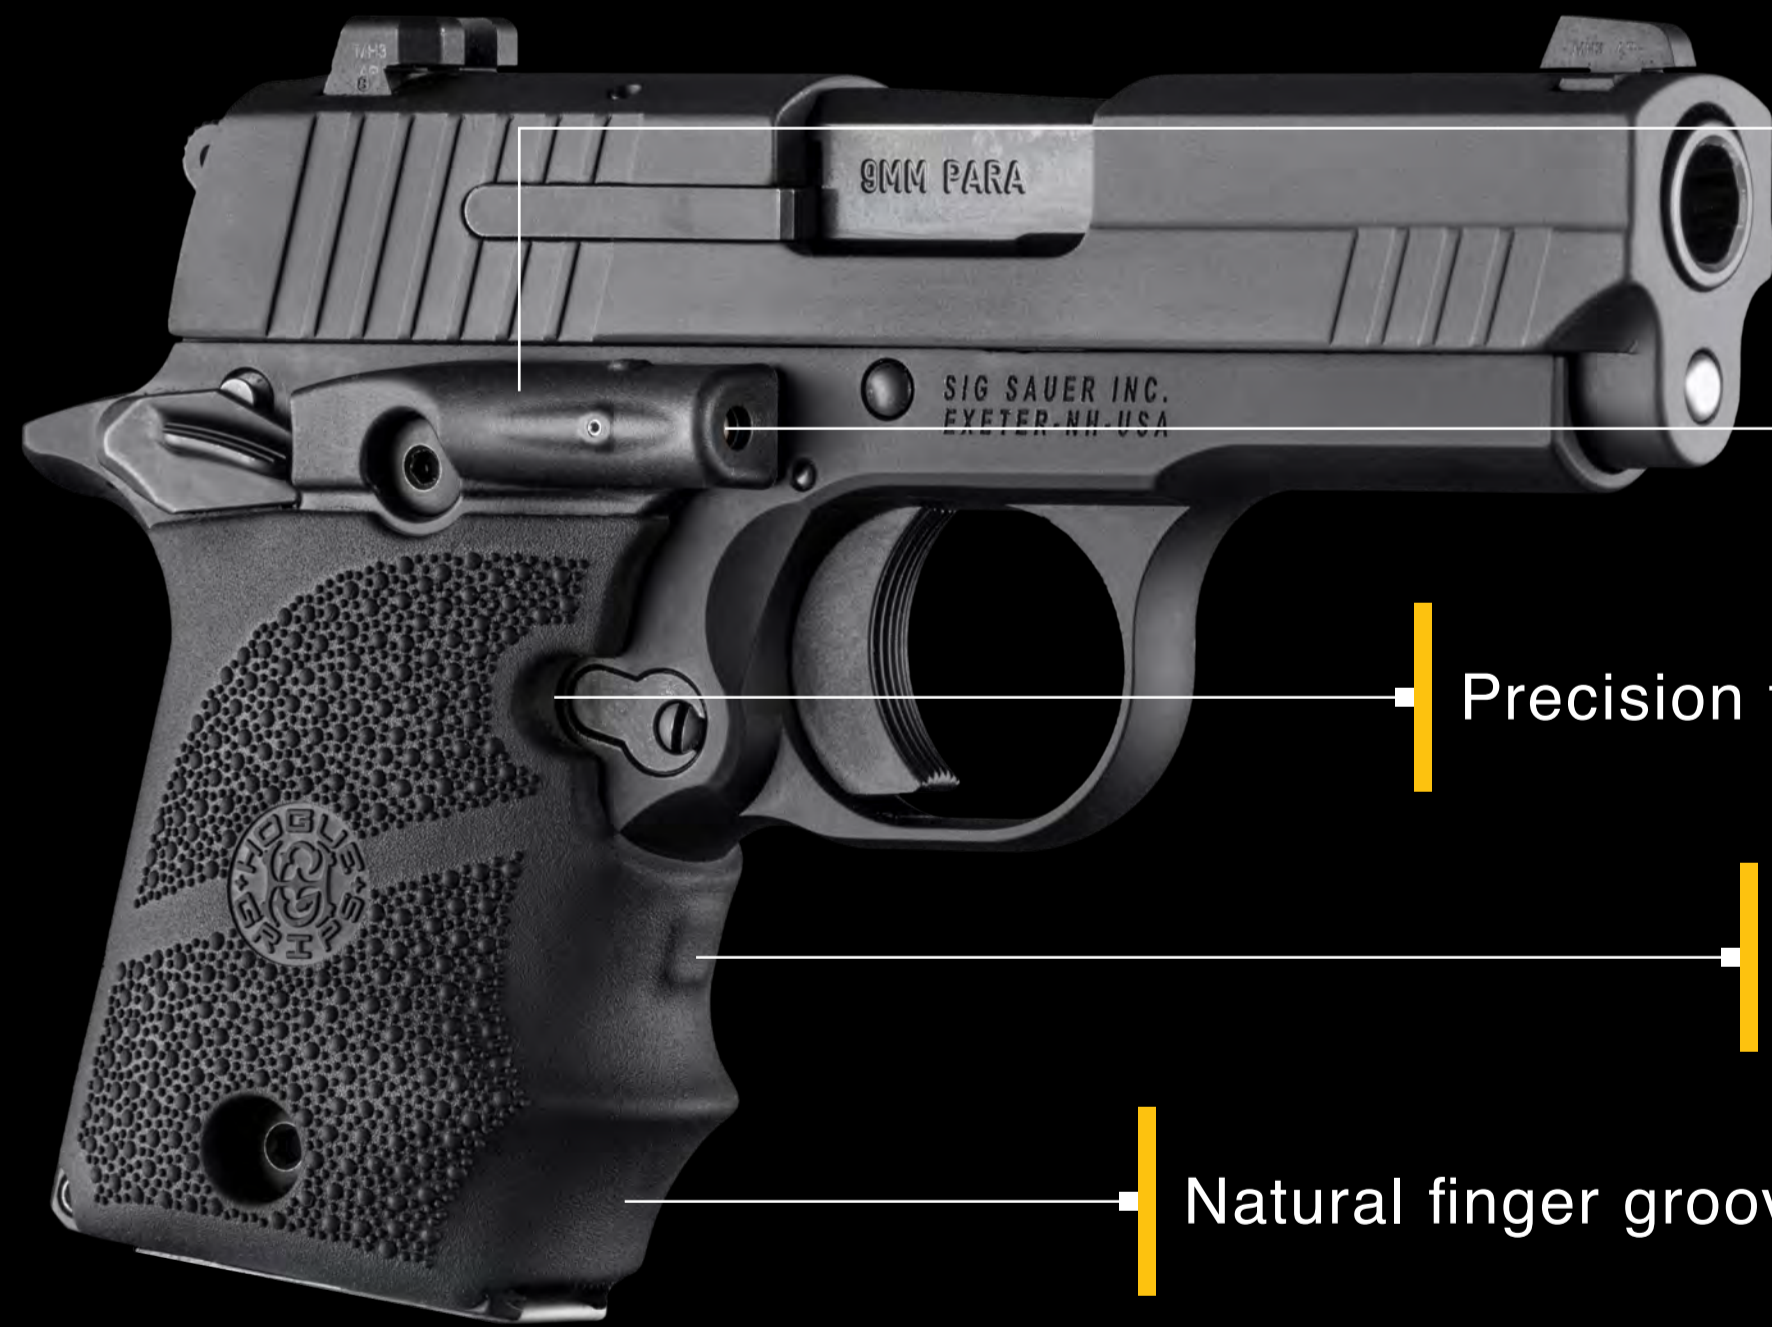

**HENDERSON, NV** – Continuing the expansion of Hogue’s Laser Enhanced grip line, models are now available for the Springfield Armory® 911 and the SIG SAUER® P938. These new red laser enhanced grips accompany the concealability of both popular everyday carry pistols and offer an added level of security through swift target acquisition.

Hogue’s LE grips host a fully programmable, digitally-controlled, microprocessor circuit. Hogue engineers capitalized on this advantage by programming three operating modes: steady, flashing or stealth target. Four user selectable intensity levels are also programmed into the LE grip’s circuit offering a range of brightness to accommodate specific environments. Sophisticated power management routines ensure long life from two common CR-2032 batteries hidden under the grip on the non-laser side – an important design feature enabling battery changes that will not take the laser out of zero. Each LE grip is bore-sighted at the factory, while fine windage and elevation adjustments are controlled via small set screws. All of the grip’s programming features are accessible by a pressure-sensitive, intuitive button on the side of the grip.

Red laser models are available in OverMolded® black rubber for the Springfield 911 and SIG P938, supported by a 3 year warranty and MSRP at \$189.95. Hogue LE Grips are made in the USA and backed by three generations of manufacturing expertise. For more information, please call Hogue directly at 1-800-438-4747 or visit [www.hogueinc.com](http://www.hogueinc.com).

## SIG SAUER P938

98060 | MSRP \$189.95

630-670 nm<5mW  
Class 2HZ 3R

Ruggedized 4mW  
red laser diode

Precision fitment

Intuitive button activation

Natural finger grooves

## SPRINGFIELD 911

49060 | MSRP \$189.95

4 user selectable  
brightness levels

Windage & elevation  
adjustment

Cobblestone™ texture

3 operating modes: steady,  
flashing or stealth target

Durable and comfortable  
OverMolded® rubber
