

## INSTALLATION OF THE EX-02 POCKET CLIP KIT

- To replace the existing pocket clip:** **1)** Remove the existing pocket clip. **2)** Install the new pocket clip. Use caution when tightening the new pocket clip screws. The fine threads on the replacement screws will strip if overtightened.
- To replace the scale screws:** **1)** Remove and replace the scale screws (shortest screw) one side at a time.
- To replace the safety screw (IMPORTANT: Do not remove safety screw without tool):** **1)** Open the knife and engage the safety. **2)** Insert the supplied wooden dowel into the knife through the finger cut-out slightly below the safety. Keep pressure on this while removing the safety screw and replacing it with the new safety screw. **Do not move the safety while the screw is out.**

### Package Contents:

1 Belt Clip	1 Safety Screw	1 Torx Wrench
2 Belt Clip Screw	4 Scale Screws	1 Wooden Dowel
