Hogue Unveils New Compact Version of the Popular Counterstrike OTF

The Counterstrike family gets two new additions, with just as much punch as their full sized siblings.

Henderson, NV – Those who revere the Hogue Counterstrike but prefer a more compact blade style—without compromising the same elite construction and precision functionality—are due for a celebration! The slimmest and most refined Out the Front to hit the Hogue Knives lineup of American-made knives is now receiving a micro model.

The new Collector Series Micro Counterstrike features a 1.95" stone tumbled, double edge blade with CPM MagnaCut stainless steel, cryogenically heated treated to 62–64 HRC. At a mere 1.9 oz, the knife maintains an extremely light weight through a streamlined, 6061–T6 anodized aluminum case completed with an ornate milling pattern, providing both grip and aesthetics. The Micro Counterstrike also includes a deep carry, reversible pocket clip, removable carbide glass breaker with replacement filler screw, and is offered in two decadent cover combinations—black Carbon Fiber and reinforced Cocobolo laminate.

Both new Micro Counterstrike OTF automatic offerings will be released at Blade Show West on October 10th, 2025 at 10AM MT.

Every Hogue knife is made in the USA and is backed by three generations of manufacturing expertise. Hogue automatic knives are only for sale to legally permitted users through authorized dealers. For more information, please call Hogue directly at 1-800-438-4747 or visit www.hogueknives.com.
