Modern Craftsmanship for a Timeless Legend.

Hogue Inc. introduces new premium grip panels for the legendary Heckler & Koch P7M8.

Henderson, NV — Hogue Inc., a leading manufacturer of premium firearm grips and accessories, is proud to announce the release of its newest grip panels designed specifically for the iconic Heckler & Koch P7M8 pistol.

Long regarded as one of the most innovative and collectible handguns ever produced, the HK P7M8 has maintained a devoted following among enthusiasts, collectors, and professionals alike. Hogue's latest offering brings modern craftsmanship and materials to these rare pistols while preserving their distinctive character and handling.

These new grip panels are available in both precision-machined G10 and finely crafted hardwood configurations, providing both rugged contemporary performance and classic elegance.

Most notably, Hogue's hardwood models feature innovative internal metal reinforcement components engineered to prevent warping, cracking, or splitting over time — a significant advancement to accommodate the unique frame geometry of the P7M8 platform. This hidden structural enhancement allows the grips to maintain their fit, integrity, and appearance through years of use and environmental changes.

“Our goal was to create a grip worthy of the HK P7M8's legendary reputation,” said Pat Hogue. “The reinforced hardwood design represents a major engineering achievement, delivering the warmth and beauty of natural wood with greatly enhanced durability and stability.”

Every Hogue product is manufactured in family-owned and operated facilities under the direct supervision of the Hogue family. To learn more about our HK P7M8 grips or to explore our full handgun grip line, please call Hogue directly at (1-800) 438-4747 or visit hogueinc.com.
